
Building Neighborhoods

Posted by VickieB1 - 2007/07/25 04:45

Here in Michigan we have 6 homes that are participating in a state initiative for Innovative Design and Culture Change. All started their Eden journeys and broke ground on for new buildings last October. They have expended tremendous time and energy on personal and physical transformation. Now it is time to focus on organizational. All will be moving into neighborhoods in the next six months. We need and appreciate any insights - process, planning, organizational charts, job descriptions, successes, pitfalls to avoid, etc. that anyone is able to share. Tell us your stories, please! Thanks!
